COVID-19 Information

Symptoms

May appear 2-14 days after exposure to virus and include:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

What if I've already had COVID-19?

People who have tested positive for COVID-19 within the past 3 months and recovered do not have to quarantine or get tested again as long as they do not develop new symptoms. People who develop symptoms again within 3 months of their first bout of COVID-19 may need to be tested again if there is no other cause identified for their symptoms.

Who Counts as a Close Contact?

- You were within 6 feet of someone who has COVID-19 for a total of 15 minutes or more
- You provided care at home to someone who is sick with COVID-19
- You had direct physical contact with the person (hugged or kissed them)
- You shared eating or drinking utensils
- They sneezed, coughed, or somehow got respiratory droplets on you

Action to Take

Student/Staff with:	Action:	Communication with school community
COVID-19 Symptoms	*Send home if at school . *Recommend testing . *School/classroom remain open.	No action needed.
Close contact with confirmed COVID-19 Case	*Send home if at school *Exclude from school for 10 days from last exposure, per CDP quarantine recommendations. *Recommend testing 5-7 days from last exposure (will not shorten 10-day exclusion if negative). *School/classroom remain open .	Consider school community notification of a known exposure. No action needed if exposure did not happen in school setting .
Confirmed COVID-19 case infection	*Notify the Local Health Department (LHD), Exclude from school for 10 days from symptoms onset date or, of asymptomatic, for 10 days from specimen collection date. Identify Jeanne Pentorali Jeanne.pentorali@fics.us , inform LHD of identified contacts, and exclude contacts from school from 10 days after the last date the case was present at school while infectious. *Recommend testing asymptomatic contacts 5-7 days from last exposure and immediate testing of symptomatic contacts (negative test results will not shorten 10 day exclusion). *Disinfection and cleaning of classroom and primary spaces where case spent significant time. *School remains open.	School community notification of a known case. Notification of persons with potential exposure if case was present in school while infectious.
Symptomatic person tests negative or a healthcare provider has provided documentation that the symptoms are typical of their underlying condition.	*May return to school after 24 hours have passed without a fever and symptoms have started improving. *School/classroom remain open	Consider school community notification if prior awareness of testing.
